# Agricultural Educator Awards 2017

**THE FARMERS CLUB**  
ESTD LONDON 1842

**Agricultural Educator Awards are specifically designed to help those employed in agricultural education to widen and develop their own technical expertise through study activities either inside or outside the United Kingdom.**

**Applications focusing on the application of science and technology in farming which contribute to the sustainability and profitability of agriculture in the UK, as well as improving the future security of our food production, will be especially welcome.**

## **Introduction**

This Charitable Trust was founded in 1981 by The Farmers Club to assist the agricultural community to achieve a number of objectives which will contribute to the development of the industry. Specific objectives are the dissemination of information, loans or scholarships or other financial assistance for research, or courses connected with the study of agriculture and support activities calculated to advance education and training in agriculture.

The Agricultural Educator Awards are part of the overall programme and are specifically designed to help those employed in agricultural education, especially those early in their career, to widen and develop their own technical expertise through study activities either inside or outside the United Kingdom. In doing so it is anticipated this will both assist the career prospects of the applicant and also any students for which they will be responsible after their return. The successful applicants will also be made honorary members of The Farmers Club for the duration of the award.

## **Awards**

In 2017 a total of £25,000 is available for a number of study awards. Normally these would be up to 4 weeks duration but longer/shorter term awards will also be considered.

Applications focussing on the application of science and technology in farming which contribute to the sustainability and profitability of agriculture in the UK, as well as improving the future security of our food production, will be especially welcome.

## Application

Applicants must at the time of application be actively involved in agricultural education or in a recognised agricultural establishment in the United Kingdom. All should provide the following information:

- (a) Outline plan of the programme of study they wish to undertake and a definitive title for the final report of the study period.
- (b) The country and place(s) where the study would be based.
- (c) The names and addresses of two referees, one of whom should be familiar with applicant's present employment.
- (d) An endorsement by the employer to the effect that he/she, subject to the applicant being successful, will be willing to:
  - (i) support the candidate's outline proposals and
  - (ii) continue to pay the applicant's salary for the duration of the award.
- (e) An endorsement by the applicant to the effect that:
  - (i) They are prepared to fulfil the conditions of the award, including the completion of a report and, if required, the presentation of a paper.
  - (ii) The closing date for applications is Monday 6th February 2017.

## Selection Procedure

The Selection Committee will interview candidates who are shortlisted at The Farmers Club in London on Tuesday 14th March 2017 and results will be announced shortly thereafter.
