Self Assessment Writing Workshop for Curriculum Leaders

Robust and rigorous self-assessment is at the heart of all quality cycles and improvement plans. Managers are expected to use all the available evidence to make accurate judgements on all aspects of provision and clearly identify where quality can be enhanced.

This workshop focuses on the key processes involved in successful self-assessment including developing team vision and evaluation at study programme / curriculum level. Participants will develop ideas to support the delivery of their curriculum areas and begin to generate key judgements and statements for inclusion within self-assessment documentation. Training will reinforce knowledge of the common inspection framework and key questions to develop a culture of continuous improvement.
